Some background

PATRIMONIVM
Geography and Economy
of the Imperial Properties
in the Roman World

- Patrimonium ERC-StG 716375
  - Is NOT an epigraphical project *per se*
  - But aims at conducting a multidisciplinary socio-economic study of the properties of the Roman emperors from Octavian/Augustus to Diocletian
  - Sources will be **encoded** with metadata related to the research questions (places, people, institutions)
  - Using **TEI** / **EPIDOC**

TEI < Text Encoding Initiative >

ATLAS PATRIMONII

- Plateform for encoding
- & querying / displaying data
- Curation of metadata is done via an integrated thesaurus manager

- → ALL in 1 SINGLE

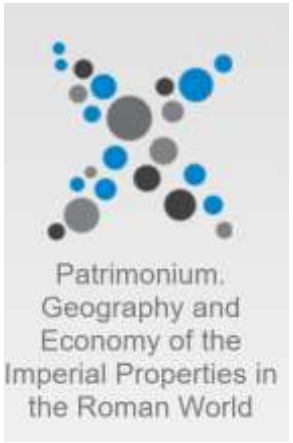
http://exist-db.org/

- A NoSQL (XML native) database & Application platform
- EPIDOC files can be directly created, stored and curated 'as such'

- 'library' approach:
  - 1 app for you project
  - Using a library that is installed beside



http://exist-db.org/

- library contains:
  - Xquery functions
  - JScript
  - Css
  - Other resources (images, fonts).
- App contains functions to build the HTML page and do things specific to the project
  - General layout
  - CSS
- Data is stored outside the app

DB structure

```
